Education	:	Karnal Aeronautical Engineering, Punjab Engineering College
Achievement	:	First Indian Woman Astronaut 1997
Qualities	:	Determined, hardworking, ambitious
Death	:	Space Shuttle Columbia disaster 2003

Answer:

Kalpana Chawla was born on 1st July, 1961 at Karnal in Haryana. She studied in Karnal Aeronautical Engineering and Punjab Engineering College. Her great achievement is that she became First Indian Woman Astronaut 1997. Her all success depends upon her determination, hardworking and ambitious nature. She passed away in Space Shuttle Columbia disaster 2003.

II. Develop a story using the clues given below: 1x3=3

An old farmer idle and useless sons was dying anxious for the sons calls them says in one part of the property is a hidden treasure dies sons take spade dig through the field no treasure found lesson learnt fields yield good crops happy.

Answer:

Once upon a time, there lived an old farmer with his sons in the countryside. All his sons were very lazy and had never gone to the fields. The old man thought of a plan to teach them the value of work. When, one day, he was on his deathbed, he summoned all of them. He told them that a considerable amount of treasure lies buried in his long neglected fields. Then his breath failed and he died. The sons immediately went to the fields and began digging hard to find out the hidden treasure. But they couldn't find anything. Then, the monsoon came. They sowed seeds on the tilled soil. That year, they had a rich harvest. They understood that that was the real treasure.

III. Study the picture given below: 1x3=3

Write a description or an account of what the picture suggests to you in a paragraph.

Answer:

In this picture we can see traffic in most of the big cities. The increasing number of vehicles is the primary cause of traffic congestion. Traffic jams can also be caused by some drivers' carelessness and disobedience of traffic rules. A traffic jam wastes fuel and time while polluting the environment. Always look to your left and right for oncoming traffic before crossing the street, and then wait until it is clear. Drivers must drive only when the road is clear and the traffic signal is green. Avoid using devices like smartphones while you're driving or walking on the road.
