Save the forests, save life.

Introduction:

Forests are the natural beauty of our world. Forests are the place where the trees and all kinds of animals were lived. Forest is the place where we could find all type of trees. Forests are getting destroyed now a days. We have to stop that.

Causes for the destroying the forest.

- * Cutting trees.
- * Building factories
- * Population explosion.
- * Using a lot of plastic.
- * pollution
- * No one grows the trees.

We get so many thing from forest. Namely

- * Wood
- * Wind
- * Rain
- * Forests control the pollution.
- * They are the home for so many animals.

We cannot live without the trees. Because they gave us Oxygen to breathe. We need that. So we must grow the trees. They give us flowers and fruits also. If all forests will destroy then all wild animals ^{will} start ^{to} come into our places. There would be imbalance in the nature. We couldn't get grain properly.

- * We should grow many trees
- * We couldn't cut them.
- * We should protect the forests and trees.

There are many slogans to grow & the importance of the trees in people as like "Save trees Save Earth." "Save water. Save earth," "Save forests save life"; and so on. They provide them food also.

Conclusion:-

We should protect the forests. We use eco friendly thing and grow more trees. We are the person who have lived on the earth
